## Position Responsibilities

The Wastewater Technical Support Specialist will work in collaboration with the sales and marketing teams in providing support to wastewater service and distribution companies, ensuring successful treatment programs.

- Help develop, write and edit documents such as technical bulletins, proposals, reports, and training materials.
- Work with the sales staff to help train clients and maintain accounts through occasional site visits and trouble shooting.
- Work with R&D to develop improved support service offerings, field testing tools, and data for clients.

## Minimum Requirements

- One to five years of wastewater experience in support, sales, or engineering
- Technical understanding of wastewater treatment processes
- Strong organization and follow through
- Excellent listening, training and presentation skills
- Adaptable to work with the changing dynamics of customer needs
- A desire to build and grow with the company and industry
- Excellent verbal/written communication and computer skills required
- Ability to lift 50 lbs. occasionally and do some hands on work in the field with wastewater clients
- Availability for daily, overnight and at times multiple day travel (50%)
- Ability to handle multiple projects and situations

*Real Science.  
Trusted Process.  
Proven Success.*

## Education/Training

- MS in either Biology, Microbiology, Chemistry, Environmental Sciences, or Engineering
- BS with additional years of industrial experience also considered

## How to Apply

- Begin the process by submitting your resume [HERE](#)
- You must also complete a Culture Index Survey [HERE](#) in order to be considered for the position. Your application will not be reviewed without the completion of the survey
